

T4 Bra Fitting Instructions

After opening, please lay the bra flat on a large flat surface, ideally somewhere warm, the heat will make the bra more pliable and fitting an easier task.

Wash piece or in direct sunshine, the heat will make fitting a lot easier!

1. Unfold the bra and turn inside out.

Please take care to push the corners out fully using something with a soft point. Failure to do this will mean the bra will not fit properly and could be damaged during fitting.

The ends should be pointed as in the above photos, all four corners require pushing out.
