

VW GOLF MK.II REAR WHEEL ARCH MOULDED CARPET

CK5572

FITTING INSTRUCTIONS

To fit this wheel arch cover you will need to take several parts of the trim apart. Initially you will need to remove the rear seats, the rear quarter panel and the two panels adjacent to the rear parcel shelf. The easy part is to just remove the old wheel arch and replace it with our new one. We would suggest you apply spray adhesive to the lower areas of the carpet to hold them in place.
