## The Karmann Ghia – We still believe!

The Karmann Ghia celebrated its 60th anniversary in 2015 and to celebrate this occasion we decided to reinstate our catalogue, after 3 years out of circulation.

We re-launched the catalogue at the 2015 Volksworld show, where we also arranged the first ever UK appearance of the 1953 Karmann Ghia prototype. The display was such a success that by September we'd run out of catalogues and after such a positive response, it only seemed right to improve and re-print! So here is issue 2.

Whilst there are far fewer Karmann Ghias on the road in comparison to Beetles, we still truly believe in supporting the enthusiasts who own this wonderful vehicle. Whether you have owned one for years, or are just starting out on a project, we'd like to thank you for keeping Volkswagen's most stylish car alive.

We'd love to write here that we can supply every part you need for your Karmann Ghia, but sadly that is impossible. What we can offer you is the best range of new parts for your vehicle anywhere in the world. Whether you are looking for body trim, electrical, interior, glass, or rubber seals, our quality is the best available and our service second to none.

Many of you know David personally. He founded VW Heritage in 1986, and has steered us to where we are now with great skill and enthusiasm. As of September 2015 he has taken up position as Chairman and I have stepped into his role as Managing Director. Don't panic, there will be no big changes; I've worked at VW Heritage for 12 years as Sales Director, and my ethos and values are very much aligned with those of David's.

If this is your first contact with VW Heritage, then welcome from me. A big hello if you are an existing friend and customer, we look forward to helping you again.

# VW CLASSIC PARTS COULD BE THE ANSWER TO YOUR PRAYERS!

Our partnership with VW Classic Parts is helping enthusiasts all over the UK to track down those missing pieces for their projects from the very source that the parts came from in the first place!

Whether it is a single screw or a side panel, a headlamp or a hose, VW Classic Parts could have that elusive part you require. Having collected over 40,000 parts of obsolete stock from warehouses and dealerships around the globe this is a fantastic resource for us to be able to share with you.

David Ward, founder of VW Heritage explains the importance of this partnership to VW Heritage and the UK VW community.

***“Since starting out in the early eighties we have travelled full circle. We are still supplying hard to find and obsolete genuine parts for Beetles and other classic Volkswagen models, just now they come shipped direct from Wolfsburg –not collected by me from a German VW dealer in the family Camper!***

***This is such great news for VW enthusiasts in the UK, it's real proof that VW care about their heritage and are in full support of the UK Volkswagen scene.”***

Volkswagen haven't just drawn a line in the sand to define their classic cars, it is a rolling cut off which means even the T4 van is now classed as a classic! So we can help you get genuine parts for it, even if the main dealer can't.

Carsten Thrandorf, International Sales Director at VW Classic Parts has reinforced his commitment to VW Heritage with some great news.

***“We are expecting to reproduce 500 original parts in the next 5 years, and we firmly believe our partnership with VW Heritage will go a long way to making sure these are the “right parts” to manufacture, and that they are available to the enthusiasts who really need them.***

***In VW Heritage we have found a company with over 25 years experience and a strong team of knowledgeable enthusiasts who are able to offer the level of service that is expected by existing and new customers of the VW brand. We can only look forward with anticipation and excitement to the future of this partnership.”***

# UNDERSTANDING YOUR KARMANN GHIA

If you're lucky enough to own one of the ½ million Karmann Ghias ever produced then congratulations. Your car, and indeed each and every one is very special, and arguably one of the most beautiful cars ever made.

The Karmann Ghia was the brainchild of Wilhelm Karmann Jnr. His father, Wilhelm Snr. founded Karmann Karosserie, and was responsible for the production of the VW Beetle Cabriolet at their Osnabruck based factories. He sadly passed away, but left the company in very safe hands.

Despite Volkswagen's lack of interest Wilhelm enlisted Carozzeria Ghia of Turin to produce a prototype sports car, built upon the already familiar Type 1 chassis; it was his hope that with a fully functional design study he would win over VW CEO Heinz Nordhoff and secure the future of his dream.

With the Beetle chassis widened, and a hand built coupe body bolted on, (not a sleek spyder as original specified) the prototype was unveiled in a private garage in Paris. VW were so impressed by the design, that they signed it off for production in 1953. However it didn't go on sale for another 18 months due to production and process refinements stipulated by Volkswagen.

Although the 1955 production version of the car differs slightly from the prototype with nostril vents added and the engine lid and exhausts changed, the car remained very true to its original concept.

The earliest of examples made between '55 and 1959 are called 'Lowlight' models; and sport smaller nostrils, smaller tail lamps, and of course head lamps mounted lower down on the front panel. In 1957, the Karmann Ghia cabriolet was released to the public; once again developed behind closed doors, then shown to VW for approval and commission afterwards.

The biggest change came in 1960, with a facelift. Headlights were moved higher and the ventilation nostrils grew bigger. In 1961 the Type34 "Razoredge" Karmann Ghia was launched, which was intended as a larger and more luxurious sister model to the Type14. These were never as popular as the original design and production ended in 1969. Whilst we don't offer many parts for these cars, we are most appreciative of its distinctive design.

Between '62 and '69 the Type14 was also manufactured in Brazil. In total 23,500 cars were produced there, although only 177 of the cars sold were cabriolets. The Karmann Ghia TC replaced it from 1970 -76.

Cosmetically little changed throughout production, front indicators and rear lights got bigger in 1970, and the rounded bumpers were swapped for the larger 'Europa' style in 1971 to conform to US crash testing standards. This style remained until 1974 which saw the end of German production.

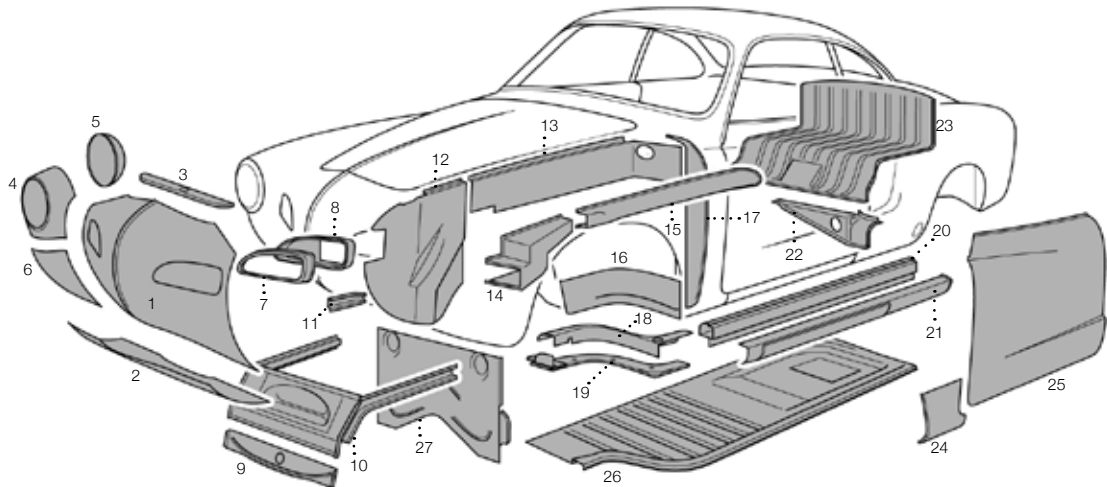

The Type14 shares its engine, gearbox, steering, braking and suspension with the Beetle that was produced in the same year. For this reason our catalogue contains only the specific parts for the 'Ghia. For all other components please refer to our VW Beetle catalogue.

## FACTORY FIT SEAT COVERS

Our seat cover sets are manufactured by TMI in the USA using original patterns and original style material. You choose your own seat cover upholstery. There are 3 types of material to choose from. Basket weave, OEM and smooth vinyl. OEM and Smooth Vinyl covers cost the same as each other.

Their prices are listed using the suffix 'OEM' after the part number.

### OEM CLASSIC VINYL

1956-1967, always supplied with off-white piping.

### SMOOTH VINYL

Supplied with matching piping.

### BASKET WEAVE

Supplied with matching smooth vinyl side panels and matching piping.

Colour swatches can be found on page 18.

For fabric samples please call.

#### Material and colour selection

Each seat cover set has a combined material and colour code. For example; If you have a 69-71 Ghia Coupe (seat cover set 43 1526) and would like basket weave material in brown the code is 02 (see the page 18). Add your chosen code number clearly to the end of your seat cover set part number when ordering. Example: 43 1526 02.

Seat covers and door panels are 'special order items'. Full payment is charged at the point of ordering. Delivery usually takes about 6 weeks from the manufacturer.

## SEAT PADDING

A common mistake is to change the seat covers without repairing or replacing the padding. TMI padding kits make the seats look like new and feel more comfortable. Don't forget to order Sisel - this stops the seat springs eating into your seat padding.

## HOOD PARTS, SEALS & FITTINGS

**Please have your chassis number to hand when enquiring about hoods.**

**Hoods:** The Ghia hood is in 3 parts. Outer cover, inner padding (3 separate pieces) and headliner. The most significant design change was in 1969 when the glass rear window was introduced.

**Quality:** We supply German hoods using the original VW vinyl. Cloth hoods are supplied by the same manufacturer and made from 'Sonnenland material' used on the latest Porsche and Mercedes cabrios. It is guaranteed against fading or stretching and is very strong.

## HEADLIGHTS

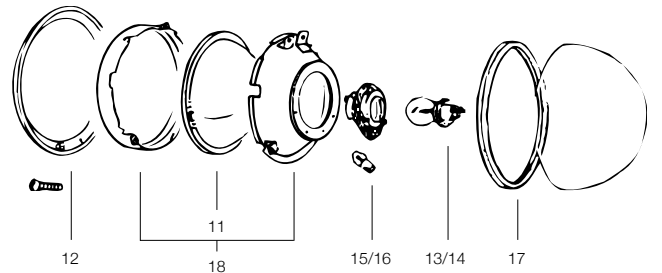

There are two variations of headlights, European and US types. Because of the large quantity of rust-free Ghias imported into Europe from the US it is important to know which country your Ghia originally comes from, so we can supply you with the correct headlight.
